

BRIAN JUMA

SOFTWARE ENGINEER

Nairobi, Kenya | +254 743 418 889 | jumabrian3583@gmail.com | github.com/Okelo123 | linkedin.com/in/jumabrian-394161296

PROFESSIONAL SUMMARY

Detail-oriented Full Stack Software Engineer with hands-on experience building web applications using Python, Flask, React, MySQL, and SQL databases. Skilled in REST API development, database design, and responsive web development using HTML, CSS, and JavaScript. Currently expanding my backend expertise by learning Laravel and PHP to build scalable web applications. Strong problem-solving, debugging, and teamwork skills with a passion for continuous learning and delivering secure, reliable software solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Frontend: React, HTML5, CSS3

Backend: Flask, REST APIs

Databases: MySQL, PostgreSQL, Supabase

Tools: Git, GitHub, VS Code, Postman

Deployment: Render, Vercel

Software Engineering: OOP, Database Design, API Development, Debugging, Problem Solving

WORK EXPERIENCE

Software Engineer | SalamaFarm

2024 - Present

- Engineered a full-stack web application using Python Flask and React, enabling real-time crop monitoring and automated disease alerts
- Designed and integrated RESTful API endpoints connecting IoT data sources to a live analytics dashboard
- Optimized MySQL database schemas and queries for sensor data storage, user management, and reporting
- Diagnosed and resolved software integration issues across frontend, backend, and database layers
- Authored documentation for system architecture, API endpoints, and deployment procedures

Web Development Mentor | Zetech University - Web Dev Community

2024 - 2025

- Mentored 10+ students in HTML, CSS, JavaScript, Python, and Git version control
- Provided targeted debugging support and one-on-one guidance on application architecture
- Facilitated hands-on workshops on web development, databases, and collaborative workflows

Software Lead | Power Learn Project

Feb 2025 - Aug 2025

- Developed health monitoring web interfaces using React, delivering clean UI and reliable data display
- Set up and managed Supabase databases for efficient data storage and real-time synchronization
- Led documentation and knowledge-sharing sessions, fostering team collaboration and consistent practices

PROJECTS

AI-Powered Crop Care System | Full-Stack Web Application

- Built a production full-stack application using Python Flask, React, MySQL, and RESTful APIs
- Developed responsive frontend with automated alert dashboards, historical data charts, and role-based access control
- Designed and implemented REST API endpoints in Flask to process and serve live sensor data in real time
- Managed MySQL schema design and optimized queries for historical data retrieval and reporting
- Deployed and maintained as a real production system actively supporting farm operations

Health Monitoring Web App | PLP Final Project

- Led team as group lead, managing full project delivery from system design to final presentation
- Built a health monitoring web application using React, focused on clean UX and reliable data display aligned with SDG 3: Good Health and Well-being
- Ensured on-time delivery with clear documentation across the software development lifecycle

Property Workflow Management System | Personal Project

- Developed a property management system handling tenant onboarding, rent payments, and maintenance requests
- Built using HTML, CSS, JavaScript with backend logic and MySQL database for real-time data display and workflow automation

EDUCATION

BSc Software Engineering | Zetech University 2023 - 2026 (Expected)
Relevant Coursework: Software Engineering, Data Structures & Algorithms, Database Systems, Web Technologies, Object-Oriented Programming, Data Science, Mobile Development

Power Learn Africa Scholarship (PLP) | Web Technologies & Software Engineering Feb 2025 - Dec 2025
Track

- Completed intensive training in Web Technologies, Database Management, Software Engineering, and AI for Software Engineering
- Built and delivered full-stack web projects as part of the structured program curriculum

CERTIFICATIONS

- AI in Software Engineering – Power Learn Project (PLP)
- Software Development – Power Learn Project (PLP)

SOFT SKILLS

Team Collaboration | Communication | Critical Thinking | Analytical Skills | Adaptability | Problem Solving | Time Management

LANGUAGES

- English — Fluent
- Kiswahili — Native
